

Primary Isolation Valves

Integrally forged, one piece slimline Monoflange valves for primary isolation of pressure take-offs, where the valve is mounted directly to the vessel or process pipe

General Application

Suitable for applications including isolation, sampling, pressure and level measurement. Instruments may be mounted directly to the valve outlet or remotely with gauge lines/impulse pipe work.

TECHNICAL DATA

Materials

CS, 316 SS, Duplex, other exotic materials

Seats:

Metal

Connections

Inlet:

ANSI flanged 1/2" to 2"
API flanged to 2 1/16"

Outlet:

1/2" NPT

Pressure (max):

10000 psig (690 barg)

Temperature (max):

1000°F (538°C)

HD7M

HD7MK

Features

- One-piece ultra-slim forged body combines a compact design with strength and reduced potential leak paths compared to conventional designs.
- Flanged inlet connections available in a choice of sizes and ratings to suit each application.
- Outside screw and yoke (OS&Y) needle type globe valve with investment cast yoke and bolted bonnet provides high mechanical strength and reliability on primary isolation service.
- Heavy duty needle type globe valve ensuring bubble-tight shut-off on venting or isolation service.
- Gauge adaptors allow flexible positioning of gauges and instruments with a choice of designs available (optional).
- Firesafe design to meet API 607, BS6755 Part 2 (optional).

HD7M/HD7MK SERIES

Primary Isolation Valves

Product Overview

Monoflange HD7M

The HD7M features a 0.2 inch (5 mm) bore 'HD' globe style needle valve for isolation service.

Monoflange HD7MK

The HD7MK features a 0.2 inch (5 mm) bore outside screw and yoke bolted bonnet (OS&Y) valve for isolation service.

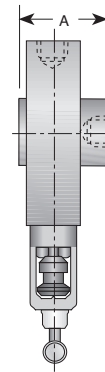

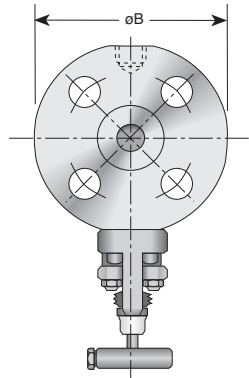

Standard pressure testing

To BS EN 12266-1.

Standard material traceability

To EN 10204 3.1 (body only).

Material thickness to ANSI B16.34.

Valve Body - Material Codes

Description	C	L	S	D
Valve body	A105N	A350 LF2	A182 F316	A182 F51

NOTE

Carbon steel valve bodies are zinc plated and passivated as standard.

HD7M and HD7MK Series Flanged x Threaded

Primary Isolation Valves

'HD' Needle-Type Globe Valve

The HD needle-type globe valve has a rotating stem with a free-swivel ball-end seat for repetitive bubble-tight shut-off and rolled threads for low operating torque, located above the spindle packing and isolated from the process. The stem seal is either graphite or PTFE rings and a backseat design provides secondary stem sealing and prevents stem blowout. A body-to-bonnet metal pressure seal below the threads prevents corrosion and ensures the bonnet threads are in loaded compression for additional strength and an O-ring weather seal protects bonnet retention threads from harsh environments. An adjustable gland follower allows easy access to adjust the packing gland and the valve features a T-bar handle with locking bolt to secure it firmly on the stem.

- Pressure rating: Up to 10000 psig (680 barg)
- Temperature rating: -71°F to 1000°F (-57°C to +538°C)

Primary Isolation Valves

OS&Y Needle-Type Globe Valve

The OS&Y needle-type globe valve has a bolted bonnet for strength and reliability and a precision cast yoke which assures perfect stem alignment. The rotating stem has a free-swivel ball-end seat for repetitive bubble-tight shut-off and rolled threads to prevent galling that are completely isolated from the process with protective bellows that protect against atmospheric contamination. The stem seal is either graphite or PTFE rings and a backseat design provides secondary sealing and prevents blowout. A flange gasket ring ensures a bubble-tight body-to bonnet seal and an adjustable gland flange/follower allows easy access to the packing gland. A weather-resistant plastic bonnet cap prevents stem lubricant contamination and the valve features a T-bar handle.

- Pressure rating: Up to 6000 psig (414 barg)
- Temperature rating: -71°F to 1000°F (-57°C to +538°C)
