

HA-70

FLOAT TYPE AIR ELIMINATOR

GENERAL FEATURES

Any system filled with water or other liquids will not function correctly unless air and other incondensable gases are removed. Ayvaz HA-70 prevent air and other gases from retarding circulation, causing corrosion and noise, inhibiting the filling of systems or priming of pumps.

There are available in variety of designs for hot water, cold water and many other liquid systems. Ayvaz HA-70 can easily be dismantled for servicing, usually without disturbing pipe connection.
