

Biffi RPD/RPS Pneumatic Actuators

Rack and Pinion Design

Double-Acting and Spring-Return pneumatic quarter-turn actuators for on-off and modulating control of valves in heavy duty service. Models available for output torques to 3.700 Nm.

General Application

RPD and RPS actuators are designed to provide maximum torque output with minimum supply pressure for any quarter-turn application such as ball, plug, butterfly valves or dampers.

Approvals

Safety Integrity Level: (IEC 61508-1÷7:2010) suitable for use in SIL 3 applications

Area Classification:

(ATEX): II 2 GD

Enclosure Standards:

(IEC 60529): IP66, IP66M, IP67M

(ANSI/NEMA 250): NEMA 4, 4X, 6

Pressure Equipment Directive: PED 2014/68/EU

Machinery Directive: 2006/42/EC

Features

- Weatherproof and totally enclosed fabricated carbon steel housing for maximum strength.
- Constant output torque throughout the 90° stroke.
- Adjustable bronze sliding block ensures low transverse forces.
- Minimal friction nitrided rack.
- Precise angular stroke adjustment 90 degrees +/- 4 degrees at each end of travel.
- Electroless nickel-plated polished cylinder for corrosion resistance and minimal friction.
- Low hysteresis and high sensitivity floating-type piston seals prevent sticking problems.
- RPS spring module is fully encapsulated, ensuring personnel safety and simplifying assembly.
- RPS mountable as spring to close or spring to open without modification.
- Lever or jackscrew manual override.
- Extensive range of accessories available.
- Special coatings for offshore or corrosive environments.

Technical Data

Design pressure (MAWP): 12 barg maximum

Supply Medium: Air, nitrogen or sweet gas

Output torques: up to 3.700 Nm

Standard temperature range: -20 °C to +100 °C
(-4 °F to +210 °F)

Extended temperature range: -60 °C to +135 °C
(-70 °F to +275 °F)

MAWP: Maximum Allowable Working Pressure refers to the maximum pressure an actuator component can handle based on its design.

MOP: Maximum Operating Pressure is the pressure that generates the torque needed to engineer the mechanical loaded parts of the actuator and it is the one required to produce the Maximum Operating Torque (MOT) of the actuator.

RPD - Double-Acting

RPS - Spring-Return

Materials

PART	MATERIAL
1 Housing	Ductile iron or carbon steel*
2 Shaft	Alloy steel (nickel-plated)
3 Rack	Ductile iron
4 Pinion	Ductile iron
5 Sliding block	Bronze
6 Thrust bearing screw	Carbon steel
7 Shaft seal ring	NBR rubber
8 Travel stop screw	Carbon steel
9 Cylinder tube	Carbon steel (nickel-plated)

PART	MATERIAL
10 Piston	Carbon steel
11 Piston guide sliding ring	PTFE + Graphite
12 Piston seal ring	NBR rubber
13 End flange	Carbon steel
14 Cylinder gasket	NBR Rubber
15 Tie rod	Alloy steel
16 Rack spacer rod	Carbon steel
17 Spring	Carbon steel
18 Spring retainer disk	Carbon steel

*Double-Acting available in carbon steel only.

BOM is for info only, please contact Factory for more details.
Mounting brackets and tie rods are available in stainless steel as an option.
Fluoroelastomer and fluorosilicone seals available as an option.

NOTES:

- Hold pressure: the minimum pressure needed to operate the actuator.
- MOP: Maximum Operating Pressure
- BTC: Break To Close
- ETC: End To Close
- BTO: Break To Open
- ETO: End To Open

The Table above can be used for spring to open (OP) actuators as follows:

- BTO (CL) = BTC (OP)
- ETO (CL) = ETC (OP)
- BTC (CL) = BTO (OP)
- ETC (CL) = ETO (OP)

Model	Hold Pressure (barg)	MOP	BTC	ETC	Operating supply pressure (barg)
