

## BOLLFILTER Automatic Backwashable, Self Cleanable Filter, Strainer Type 6.19 with external flushing supply

<b>Flange Connection</b>	DN 50 - DN 400 / 2" - 16"
<b>Filter element</b>	wedge wire, longitudinal wedge wire candle or wire-mesh candle with smooth surface
<b>Grade of filtration</b>	10 µm - 5 mm *
<b>Backflushing medium</b>	external medium
<b>Pressure stage</b>	PN 10 (higher pressure stages available on request)
<b>Filter housing</b>	nodular cast iron carbon steel carbon steel rubber lined stainless steel special alloys
<b>Features</b>	cylindrical elements open at both ends (bipolar functional principle)
<b>Note</b>	Version with external medium connection for low operating pressures

### Automatic backflushing water filter with external medium

The BOLLFILTER automatic Type 6.19 is used for the same application as the [BOLLFILTER Automatic Type 6.18](#) with the difference that it is especially designed for low pressure systems below 16 bar. The BOLLFILTER automatic Type 6.19 uniquely includes a connection for external medium backflush to assist by low pressure applications with water.

### Advantages of the BOLLFILTER Automatic Type 6.19

- Bipolar mode: filter and backflush modes

- Defined degree of filtration
- Suitable by low pressure applications
- Extended service life
- Minimum maintenance
