

Encoders

optical Encoder, digital outputs, 3 channels,
1000 - 10000 lines per revolution, Line Driver

For combination with
DC-Micromotors
Brushless DC-Motors

Series IER3-10000 L

Note: Please note that the available pulse numbers depend on the attachment system and therefore not all motors are available with all pulse numbers. The available pulse numbers for each motor are listed under the Combinatorics section.

Characteristics

These incremental encoders with 3 output channels, in combination with the FAULHABER Motors, are used for the indication and control of both shaft velocity and direction of rotation as well as for positioning.

With a reflective code disc two square wave signals with 90° phase shift and one index impulse per motor revolution are generated.

The optical measurement principle allows high accuracy and repeatability for positioning applications. The high resolution encoder provides up to 4096 lines per revolution. In combination with the brushless DC-Servomotors BX4 with diameter 22 mm up to 6800 lines per revolution are available. In combination with the brushless DC-Servomotors BX4 with diameter 32 mm up to 10000 lines per revolution are available.

The Line Driver version has differential signal outputs (TIA-422). Differential signals reduce ambient interference and are suitable for applications with high ambient interference.

The Line Driver amplifies the encoder signal which means that long cables can be used without signal degradation. Differential signal outputs must be decoded by the appropriate receiver module. In addition, a suitable line termination resistance (100 ohm) is possibly useful.

The encoder is connected via a ribbon cable. The pins are compatible to the FAULHABER Encoder IE3 L.

Option

Connector variants AWG 28 / PVC ribbon cable with connector EN 60603-13 / DIN-41651.

Option no.: 3806 for combination with DC-Motors series CR, CXR and with Brushless DC-Motor series BP4 and BXT H.

Option no.: 3589 for combination with Brushless DC-Motors series BX4.
Note: inclusive motor connector 3830.

Caution:
Incorrect lead connection will damage the motor electronics!
