

The Wi-Fife™ Wireless Operator Interface for the FIFE-500 allows the operator wireless monitoring and control of the FIFE-500 from any tablet or smartphone. By connecting to a network of motor control units and operator interfaces, the Wi-Fife™ can connect up to 30 devices on a single network, with the ability to monitor and control any unit. This allows for a seamless connection, flexibility and accessibility of all networked guides wirelessly from anywhere on the factory floor.
