FYBROC® SERIES 5530 VERTICAL PUMPS DRY PIT

FIBERGLASS CONSTRUCTION
FOR CORROSION
APPLICATIONS

Fybroc – the world leader in corrosion resistant fiberglass pumps

Fybroc, the world's first manufacturer of fiberglass reinforced centrifugal pumps, has led the way in the design and engineering of the industry's most technically advanced pumps for handling corrosives and other difficult liquids.

Fybroc continues to lead the pump industry through innovation, product improvement, and advanced technology. Each Fybroc product line is the culmination of years of experience in producing the highest quality corrosion resistant pumps available.

Fybroc Series 5530

The Series 5530 Vertical pump is the product of Fybroc's extensive engineering experience and knowledge of specialized production techniques. The result is a corrosion-resistant, structurally superior, highly dependable pump suitable for the most difficult dry pit applications.

Fybroc has given special attention to critical design details that ensure the ultimate in operating life, ease of maintenance, and dependability in a dry pit pump. The innovative design of the Series 5530 pump makes it a perfect choice for handling tough applications such as chemical wastes of varying pH, plating wastes, circulation of pickling liquor, electrolytes or plating baths, salt water or brine, and hundreds of other difficult services.

Materials of construction

Fybroc offers a number of different materials, each was developed to solve a variety of tough corrosive and/or abrasive pumping problems. Fybroc's standard vinyl ester resin, VR-1, handles the vast majority of corrosive applications. This premium-quality resin offers broad corrosion resistance to most acids, caustics, bleaches, sea water, brine, and other liquids. For solvent based chemicals, Fybroc offers a high quality epoxy resin, EY-2.*

Fybroc also offers an abrasion-resistant material, VR-1A, for handling liquids containing highly abrasive solids such as fly ash, diatomaceous earth or titanium dioxide.

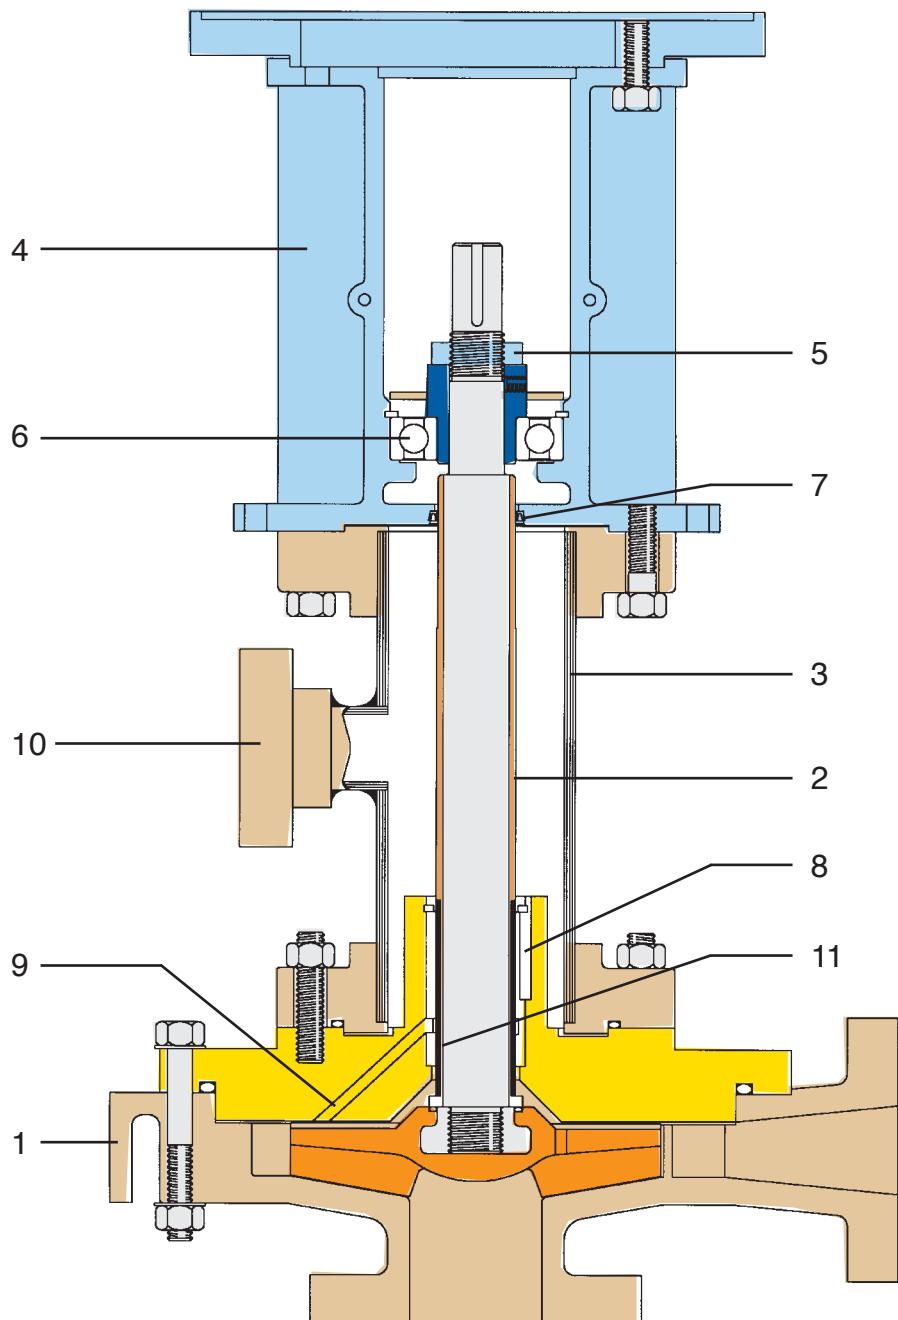

The pump shaft is FRP wrapped 303 stainless steel. All external hardware is 303 stainless steel.

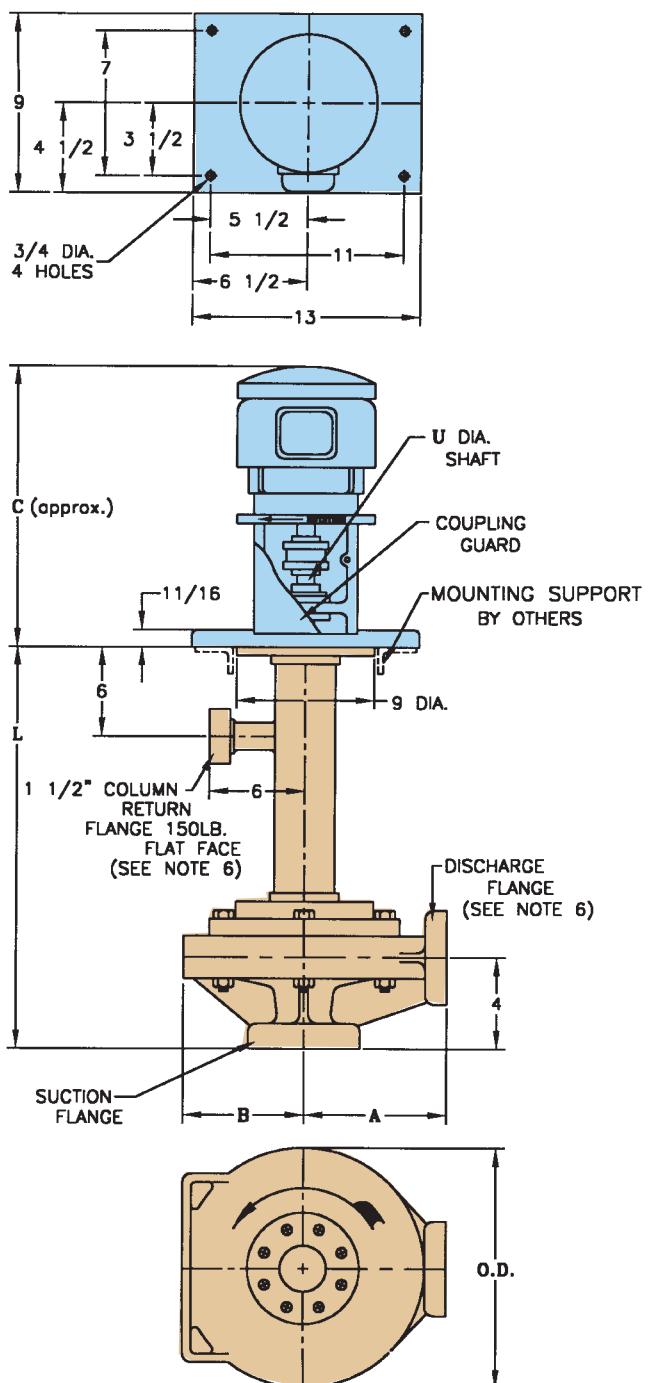

Design features of the Series 5530

The Fybroc Series 5300 Vertical pump has been designed to yield exceptional structural integrity, excellent corrosion resistance and dependable service in the most difficult chemical or waste sump environments. The unique features described on these pages provide the ultimate in operating life and ease of maintenance.

1. FIBERGLASS CONSTRUCTION for all wetted parts except lower bearing journal in either vinyl ester or epoxy resins provides tough corrosion resistance for a wide range of difficult liquids.
2. FRP WRAPPED SHAFT for improved corrosion resistance. The base shaft material and all external hardware are 303 stainless steel.
3. LARGE DIAMETER COLUMN stiffens the pump assembly to extend bearing life.
4. HEAVY-DUTY BEARING PEDESTAL is of cast iron construction to rigidly support the pump column, thrust bearing and motor, and is epoxy coated for external corrosion resistance.
5. EXTERNAL IMPELLER ADJUSTMENT allows field setting of impeller to-casing operating clearance without dismantling pump.
6. THRUST BEARING is easily replaceable and carries the entire axial thrust load from pump impeller, allowing use of flexible couplings and standard, "off-the-shelf" motors.
7. VAPOR SEAL protects thrust bearing from corrosive sump vapors. Optional gas seal can hold pressures to two feet of water column.
8. LOWER PUMP BEARING, extra-long to reduce unit surface loading, is grooved PPS and is secured in the cover by a key and snap ring.
9. PUMP COVER is drilled for flush liquid supply to the lower bearing. A fully confined Viton O-ring seals the cover to the casing.
10. COLUMN FLUSH RETURN for overflow to tank.
11. LOWER BEARING JOURNAL, Hastelloy C integral with FRP shaft.

Pump dimensions for the Series 5530

Setting No.	L
1	18
2	36

The drawing above is not to be used for construction purposes.

Pump Size	Suct.	Disch.	A	B	O. D.
1 x 1-1/2 x 6	1-1/2	1	6-1/2	5-1/4	10-1/8
1-1/2 x 3 x 6	3	1-1/2	6-1/2	5-1/4	10-1/8
2 x 3 x 6	3	2	6-1/2	5-1/4	10-1/8
1 x 1-1/2 x 8	1-1/2	1	6-1/2	5-1/4	10-1/8
1-1/2 x 3 x 8	3	1-1/2	8-1/2	8-1/4	14-1/4
2 x 3 x 8	3	2	9-1/2	8-1/4	14-1/4
3 x 4 x 8	4	3	11	8-1/4	14-1/4
1 x 2 x 10	2	1	8-1/2	8-1/4	14-1/4
1-1/2 x 3 x 10	3	1-1/2	8-1/2	8-1/4	14-1/4
2 x 3 x 10	3	2	9-1/2	8-1/4	17-1/4
3 x 4 x 10	4	3	11	8-1/4	17-1/4
4 x 4 x 10	4 (1)	4	12-1/2	8-1/4	17-1/4
4 x 6 x 10	6 (1)	4	13-1/2	10	22-1/4
2 x 3 x 13	3	2	11-1/2	10	20-1/2
3 x 4 x 13	4	3	12-1/2	10	20-1/2
4 x 6 x 13	6 (1)	4	13-1/2	10	22-1/4

Flange	O. D.	Thick.	B. C.	# of holes	Size of holes
1	4-1/4	7/8	3-1/8	4	5/8
1-1/2	5	1-1/8	3-7/8	4	5/8
2	6	1-1/8	4-3/4	4	3/4
3	7-1/2	1-3/16	6	4	3/4
4	9	1-1/4	7-1/2	8	3/4
4 (1)	9	(1)	7-1/2	8	(2)
6 (1)	11	(1)	9-1/2	8	(3)

Motor Frame	C
143TC/145TC	22
182TC/184TC	26-1/4
213TC/215TC	30
254TC/256TC	33-3/8
284TC/286TC	35-1/4
324TSC/326TSC	39

NOTES:

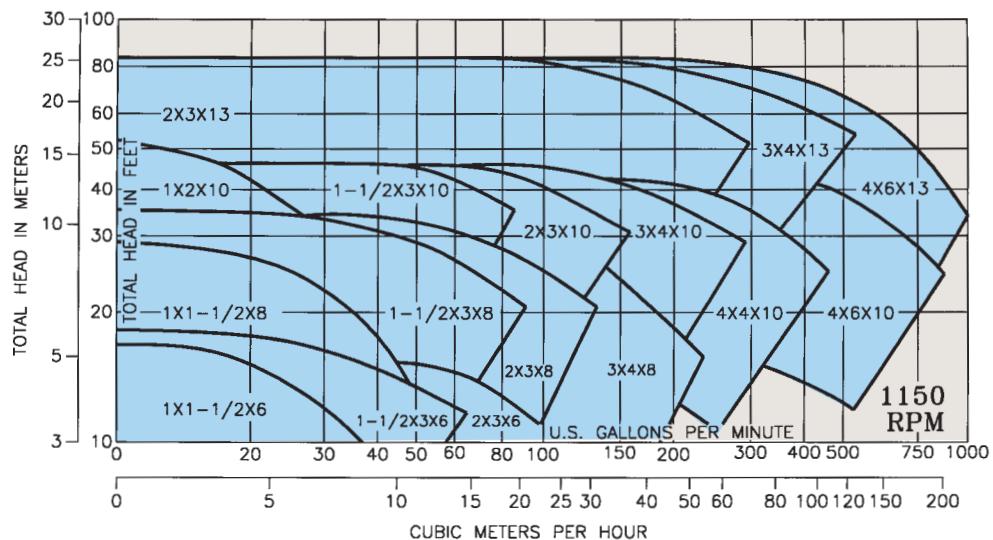

- (1) Threaded suction connections
- (2) 5/8-11 tapped holes 1" deep
- (3) 3/4-10 tapped holes 1" deep
- (4) All dimensions are in inches
- (5) Rotation is counterclockwise facing suction flange
- (6) Flanges can be oriented in increments of 45°

Additional product literature

Interested in other items in our product line? Listed below you will find bulletins on our horizontal ANSI pumps, vertical sump pumps, recessed impeller models, vertical cantilever units, 1600 Series self-priming pumps, and our Fybroc corrosion-resistant fiberglass baseplates, liquid level controls and the TEFC gland. If you would like a free copy of any of this literature, just circle the corresponding number on the enclosed postage-paid reply card. Complete the other requested information and return the reply card to Met-Pro Corporation/Fybroc Division.

Bulletin FL

Describes the world's most complete line of FRP pumps for handling corrosive and other difficult liquids.

Bulletin MS101

Chemical Resistance Guide. Describes suitability of vinyl ester and epoxy materials in hundreds of different chemical environments, along with recommendations for vertical pump shaft metallurgy.

Bulletin 15B1

Horizontal pumps built to ANSI dimensions. Capacities to 5500 GPM. Heads to 400 feet.

Bulletin 15B2

Close-coupled horizontal pumps. Capacities to 1400 GPM. Heads to 300 feet.

Bulletin 55B1

Vertical sump pumps for corrosive fluids and wastes. Capacities to 4500 GPM. Heads to 275 feet.

Bulletin 60B1

Vertical fiberglass pumps with nonclog recessed impeller design. Capacities to 2500 GPM. Heads to 130 feet.

Bulletin 75B1

Cantilever design, centrifugal and recessed impeller pumps for corrosive fluids and wastes. Capacities to 2200 GPM. Heads to 190 feet.

Liquid Level Controls Bulletin L1-Float Type, Bulletin L-2 Displacer Type, Bulletin L-03 Electrode Activated

Complete line of corrosion-resistant level control devices.

Bulletin 16B1

Series 1600 self-priming pumps for corrosive applications. Capacities to 1400 GPM. Heads to 300 feet.

Bulletin 30B1

Recessed impeller fiberglass pumps for corrosive wastes. Capacities to 2500 GPM. Heads to 130 feet.

Bulletin T1

Self-contained air-cooled seal flushing system with buffer fluid reservoir.

Baseplate Bulletin 1

Complete line of corrosion-resistant fiberglass baseplates.
