BLOWTUBE NOZZLES

GOCO

FILTER CLEANING OPTIMISATION IN SECONDS!

ABOUT PENTAIR ENVIRONMENTAL SYSTEMS

With over 78 years experience, Pentair Environmental Systems with the product brands Goyen and Mecair have provided engineering partnerships since 1935 to some of the world's largest leading industries. These valued partnerships service the power generation, cement, steel, general manufacturing and bulk solids handling industries.

The Pentair Environmental Systems brand Goyen is a world-class leader in quality products through design leadership by providing value to our customers through customer beneficial partnerships.

Our customers are supported by our world-class engineering expertise, innovative designs, high-quality and industry-leading products in the filter cleaning systems solutions market, including diaphragm valves, header tanks, cleaning systems components, pulse cleaning controllers, emissions monitoring and Tribo electric products.

Goyen and Mecair's advanced application expertise, along with our wide product range and global reach, has allowed us to maintain our valuable, long-term customer partnerships through ongoing customer support.

GOCO

FILTER CLEANING OPTIMISATION IN SECONDS!

GOCO is your filter cleaning system software design tool. GOCO encapsulates decades of filter cleaning expertise and delivers it into your particulate filter system design on demand.

GOCO. YOUR COMPETITIVE ADVANTAGE

We support this process through GOCO, consultation and additional performance testing and modelling using computational fluid dynamics.

ELIMINATE RISK

- Make the system more robust against changing dust loads.
- Reduce risk of system failure.

MINIMISE OPERATING COSTS

- Reduce compressor demand.
- Pulse noise reduction.
- Optimise filter cleaning operation.

INCREASE FILTER LIFE

- Improve scrubbing efficiency.
- Reduce pulse rate to clean filters on dP.
- Increase filter life – reduce maintenance frequency.

30% MORE CLEANING FLOW

COLLECTOR PERFORMANCE
-30% MANIFOLD PRESSURE

REDUCING COLLECTOR BUILD COST

GOYEN GOCO NOZZLE PLC

(1" AND 1.5" PIPE)

VN-25-PC-50

VN-45-PC-50

INSTALLATION

For best performance, $H = (\text{Ø Filter} - 48)/0.353$ (mm) or $H = (\text{Ø Filter} - 1.88)/0.353$ (inches). Prepare $\varnothing 22$ mm (0.866) hole in the blowtube for VN-25PC-50 and prepare $\varnothing 26$ mm (1.023) hole in the blowtube for VN-45PC-50.

DIMENSIONS

(Dimensions in mm and [inches])

MODEL	A	B	Ø
VN25PC-50	110 mm [4.33"]	76 mm [3.00"]	33 mm [1.32"]
VN45PC-50	126 mm [4.97"]	84 mm [3.29"]	48 mm [1.90"]

Nozzles must be drilled to required orifice size before installation. Ensure O-ring is in place when fitting nozzle to pipe.

DESCRIPTION

Goyen's range of plastic nozzles measurably increase developed pressures in filters during reverse pulsecleaning by balancing the flow through all holes along the blowtube, ensuring that the pulse jet is directed fully into the filters, and minimising the pressure drop through the blowtube holes. Goyen's nozzles ensure effective cleaning is achieved at A_n/A_p (total blowtube hole area/blowtube cross-sectional area) values up to 1.5, extracting maximum pulse performance from the diaphragm valves. Typical systems not using the GOCO nozzle perform at 0.5 to 0.8.

SUITABLE FOR

1" and 1.5" pipe diameters in reverse pulse jet filter cleaning applications and its variations including bag filters and cartridge filters. Plastic nozzles are not suitable for high ambient temperature applications above 80°C (176°F).

* Please Note: Not intended for use in Gas Turbine applications.

ORDER CODE AND CHARACTERISTICS

ORDER CODE	VN-25-PC-50	VN-45-PC-50
Suitable for pipe Ø	1" [Schedule 40]	1.5" [Schedule 40]
Nominal pipe external Ø mm (inches)	33 (1.32)	48 (1.90)
Temperature range °C (°F)	-40 (-40) to 80 (176)	-40 (-40) to 80 (176)
Material	PA-6	PA-6
Unit mass kg (lb)	0.060 (0.13)	0.065 (0.14)
Pipe hole Ø to accept nozzle mm (inches)	22.0 (0.866)	26.0 (1.023)

Nozzle sizes can be optimised using Goyen's GOCO software. Contact your local Goyen representative.

GOYEN GOCO NOZZLE SCREW IN

[$\frac{3}{4}$ " AND 1" PIPE]

DESCRIPTION

Goyen's range of plastic screw-in nozzles measurably increase developed pressures in filters during reverse pulse cleaning by balancing the flow through all holes along the blowtube, ensuring that the pulse jet is directed fully into the filters, and minimising the pressure drop through the blowtube holes.

Goyen's nozzles ensure effective cleaning is achieved at A_n/A_p (total blowtube hole area/blowtube cross-sectional area) values up to 1.5, extracting maximum pulse performance from the diaphragm valves. Systems not using the Goco nozzle perform at 0.5 to 0.8.

SUITABLE FOR

$\frac{3}{4}$ " and 1" pipe diameters in reverse pulse jet filter cleaning applications and its variations including bag filters and cartridge filters.

Plastic nozzles are not suitable for high ambient temperature applications above 80°C (176°F). These nozzles are designed to be screwed directly into the threaded outlet of a 'T' series dust collector valve, or into threaded sockets welded to blowtubes.

* Please Note: Not intended for use in Gas Turbine applications.

INSTALLATION

For best performance, $H = (\emptyset \text{ Filter} - 48) / 0.353 \text{ (mm)}$ or $H = (\emptyset \text{ Filter} - 1.88) / 0.353 \text{ (inches)}$. Nozzles must be drilled to appropriate orifice size before installation.

ORDER CODE AND CHARACTERISTICS

Diecast Nozzles

CODE	DESCRIPTION	MATERIAL
VNA25C-50	Diecast venturi nozzle assembly to suit 1" pipe, short barrel.	Body and saddle: diecast aluminium Clamp, nuts & washers: nickel-plated mild steel
VNA25C-100	Diecast venturi nozzle assembly to suit 1" pipe, long barrel.	Body and saddle: diecast aluminium Clamp, nuts & washers: nickel-plated mild steel
VNA45C-50	Diecast venturi nozzle assembly to suit 1.5" pipe, short barrel.	Body and saddle: diecast aluminium Clamp, nuts & washers: nickel-plated mild steel
VNA45C-100	Diecast venturi nozzle assembly to suit 1.5" pipe, long barrel.	Body and saddle: diecast aluminium Clamp, nuts & washers: nickel-plated mild steel

Nozzle Inserts

CODE	DESCRIPTION	MATERIAL	TEMPERATURE RANGES °C (°F)
AL25-B	Diecast nozzle insert to suit VNA25 series. Insert orifice to be drilled by customer. No seals required.	Diecast aluminium	-60 (-76) to 400 (752)
AL25-BD#	Diecast nozzle insert to suit VNA25 series. Insert comes pre-drilled by the factory to the size specified by #. (#=4 mm to 18 mm) No seals required.	Diecast aluminium	-60 (-76) to 400 (752)
AL45-B	Diecast nozzle insert to suit VNA45 series. Insert orifice to be drilled by customer. No seals required.	Diecast aluminium	-60 (-76) to 400 (752)
AL45-BD#	Diecast nozzle insert to suit VNA45 series. Insert comes pre-drilled by the factory to the size specified by #. (#=4 mm to 22 mm) No seals required.	Diecast aluminium	-60 (-76) to 400 (752)
REG-#	Plastic nozzle insert with rubber seal. Suits both VNA25 and VNA45 series. (#=4 mm to 22 mm)	Insert: PA-6 30% glass filled. Seal: Nitrile	-40 (-40) to 80 (176)

To order specify nozzle and nozzle insert codes separately.

For example: VNA25C-50 and REG-14 for a short nozzle to suit a 1" pipe with a 14 mm plastic insert.

VNA45C-100 and AL45-BD10 for a long nozzle to suit a 1.5" pipe with a 10 mm aluminium insert.

Nozzle sizes can be optimised using Goyen's GOCO software. Contact your local Goyen representative.

GOYEN GOCO NOZZLE [STRAPLESS]

[2", 2.5", 3" AND 4" PIPE]

DESCRIPTION

Goyen's range of nozzles measurably increase developed pressures in filters during reverse pulse cleaning by balancing the flow through all holes along the blowtube, ensuring that the pulse jet is directed fully into the filters, and minimising the pressure drop through the blowtube holes. Goyen's nozzles ensure effective cleaning is achieved at A_n/A_p (total blowtube hole area/blowtube cross-sectional area) values up to 1.5, extracting maximum pulse performance from the diaphragm valves. Typical systems not using the Goco nozzle perform at 0.5 to 0.8.

INSTALLATION

For best performance, $H = (\emptyset \text{ Filter} - 48)/0.353$ (mm) or $H = (\emptyset \text{ Filter} - 1.88)/0.353$ (inches). Prepare $\emptyset 34.1$ – 34.5 mm (1.34 – 1.36) holes in the blowtube.

SUITABLE FOR

2", 2.5", 3" and 4" schedule 40 pipe diameters as used in reverse pulse jet filter cleaning applications and its variations including bag filters, cartridge filters, ceramic filters, and sintered metal fibre filters.

* Please Note: Not intended for use in Gas Turbine applications.

1. Ensure holes prepared in the blowtube are free from burrs.
2. Assemble the insert into nozzle passing through the pipe adaptor and lockring as illustrated above. Only screw the insert part way into the nozzle.
3. Align the insert lugs along the axis of the blowtube, and hook one lug into the blowtube
4. Swing the second lug up into the blowtube and slide the pipe adaptor up and onto the blowtube hole.
5. Screw the nozzle up onto the insert, checking that all components are aligned. Hand tight is sufficient.
6. Dent the lockring into one or both of the nozzle cavities; this will ensure the assembly is permanently locked in place. To remove the nozzle, bend the dent out using a screwdriver blade.

(For detailed installation instructions, refer to DEINC-018 VNA.)
