# V1100

## PORTABLE, VERSATILE DESIGN, EXCEPTIONAL VALUE

The John Bean V1100 Mobile Wheel Alignment System combines imaging alignment technology in a fully portable package. It provides advanced technology and software to enable speed and efficiency at an affordable price. The V1100 leverages a wireless communication system with Bluetooth technology, and cordless pods powered by lithium ion batteries providing mobility and flexibility.

### Patented EZ-TOE

Turn the front wheels and access difficult adjustment points while still displaying centered toe readings

### Unmatched Mobility

Bluetooth® enabled wireless communication to sensor pods allowing the technician 101 meters of freedom - even in areas known to have high electrical interference

### Durable, Long-Lasting Hardware

Magnesium pods, targets and aluminum clamps are durable, impact-resistant and lightweight

### Battery Notification

Alert notifies the technician when the pod's battery needs to be charged. Provides a full day of operation without charging on most applications

### Manufacturer Specifications

Extensive OEM specs allow quick and accurate vehicle selection

### Help Videos

View detailed help videos of how to make needed adjustments to complete even the most complex tasks

### Customer Reports

Enhance customer satisfaction with personalized reports showing readings before and after service

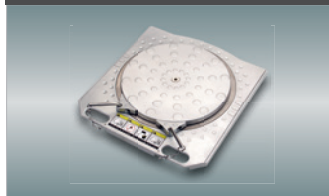

### Technical Specifications
