Temperature Module EBT - 2R / EBT - 2RE

- Internal or external sensor
- Robust ABS housing
- Indoor climate monitoring

Characteristics

The EBT - 2R /2RE is used for long-term temperature monitoring, indoor climate monitoring and monitoring of storage rooms.

The temperature is measured by the internal Pt1000 sensor (EBT - 2R) or external Pt1000 probe (EBT - 2RE), the measuring values and min-/max- values can be read out via EASYBus interface.

The housing of the module is made of robust ABS. Modules are available with or without on-site display. The modules can be configured by means of the EASYBus-Configurator software. Additional direct configuration is possible for devices with option VO (on-site display). The control panel is accessible when the cover is removed.
