

VALVES FOR GLASS LEVEL GAUGES

VALVES TYPE NY (RATING PN100)

By-pass valves offset type **COCK** for REFLEX or TRANSPARENT level glass type, 90° operation permits immediate opening/closing. Simple design (only one moving part) ensures uninterrupted operation.

The packing sleeve, the only part subjected to wear, can be replaced within minutes with cock remaining in line

Valve bore 8mm for shut-off and bore 6mm for drain.

Temperature range -100°C to +400°C, in function of the type of material.

 - ANSI 150 to ANSI600 RF with ½” to 2”
 - Threaded NPTM - GASM; Socket welding (SW)
- OPTIONAL:
 - PTFE Packing sleeve
 - Safety ball (for breaking glass)

VALVES TYPE NX (RATING PN40)

By-pass valves offset type **COCK** with stuffing box and smooth nipple, for orientation the glass with respect to connections, 90° operation permits immediate opening/closing, for REFLEX or TRANSPARENT level glass type. Simple design (only one moving part) ensures uninterrupted operation. The packing sleeve, the only part subjected to wear, can be replaced within minutes with cock remaining in line

Valve bore 8mm for shut-off and bore 6mm for drain.
